EUFRUIT – work packages:

- WP1 – Project coordination and sustain – Michelle Williams - Arhus**
- WP2 – Performance of new fruit varieties – Jef Vercammen – PCfruit;**
- WP3 – Reduction in pesticide residues – Franziska Zavagli - CTIFL;**
- WP4 – Improvement of fruit storage methods - Dirk Kopke - Jork;**
- WP5 – Secure sustainable fruit production – Marianne Groot – WUR.**

EUFRUIT

The systematic approach includes:

- i) scanning & synthesis - scan the state-of-art knowledge, practices and technologies and synthesize the material at a European level.**
- ii) showing & sharing will deliver outreach/dialogue at a national level through the establishment of local ‘operational groups’.**
- iii) sustaining the network through long-term integration of the EUFRUIT network in future actions.**

The European Fruit Network (EUFRUIT) - Knowledge Platform

EUFRUIT Knowledge Platform is an international open access database of electronic documents related to productivity, sustainability and quality of fruit in the European fruit sector. New knowledge on fruit research and best practice approaches at a European level are available in the database. It is possible to search for information in a specific language.

Focuses are on four thematic areas of critical importance to competitiveness and innovation potential of the European fruit sector:

Performance of new fruit varieties

Reduction in pesticide residues

Fruit quality; improvement of fruit handling/storage

Secure sustainable fruit production
